**Subject:** Re: private water well sampling

Good morning Greg,

We do not have the list in the EU but we'll try to get it together. Angela and Kim cc'd on this email may have more information.

Thanks so much.

Taim.

Good morning:

Can someone in the EU send me a list of the 21 counties doing the private water well sampling amnalysis?

Thanks Greg this is good news. Do you have a list of the 21 counties you could share?

Thanks in advance,

James

James,

Here is the latest info on the residential well sampling:

EPA continues to make contact with the remaining 18 counties regarding private water well testing and our research indicates that private well testing is available across the state for a nominal fee. EPA has confirmed 21 of the 39 disaster declaration counties are currently providing private well testing for area residents. Texas Department of State Health Services also offer bacteria testing for \$28 through the state lab. The TCEQ website provides public information and a list of NELAP Accredited Labs for well owners to analyze water samples for a fee.
